PAF 101

DESCRIPTION

PAF 101 is a 100% active, non-silicone antifoam emulsion for use in aqueous systems. It is suitable for use in alkaline or acidic systems at temperatures from 10° to 212° F.

PAF 101 is highly cost effective and is compatible with nonionic, cationic and anionic systems. It is readily dispersible in hot or cold water and is not affected by hard water.

PROPERTIES

Appearance	Moderately viscous tan fluid with bland color
Ionic nature:	nonionic
Activity:	100%
Specific gravity:	0.9
Freezing point:	20°F
Flash point (COC):	280°F

APPLICATION

Normally **PAF 101** is used at concentrations of 0.1 to 0.5% by volume. It may be added directly to the aqueous solution or may be sprayed onto the liquid surface.

PAF 101 may be used as is or may be diluted with water to form a stock solution. The best method of application and proper product concentration will vary with specific situations.

CAUTION

Contains petroleum distillate. Use with adequate ventilation. Keep away from open flames not to be taken internally.

For industrial use only. Keep out of reach of children.
